Mountain Weather Forecast

Snowdonia National Park

Forecast valid from 06:00 on Saturday 10 Sep 2022 until 23:59 on Sunday 11 Sep 2022

Forecast Issued on Saturday 10 Sep 2022 at 04:07

Confidence: High confidence for the weather becoming more settled this weekend, and a change to more unsettled conditions again early next week. Lower confidence though regarding rainfall details during the early to middle part of next week, with the potential for it to turn warm and humid for a while, and with fresher, but more settled weather gradually expected to arrive from the northwest.

Headline for Saturday 10 Sep 2022: Cloudy at first with widespread hill fog and a chance of a shower. Becoming brighter this afternoon, then clear spells this evening.

Mountain weather hazards on Saturday 10 Sep 2022

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Medium Likelihood

Forecast for Saturday 10 Sep 2022

Weather: Mostly cloudy to start, with widespread cloud covering the hill tops at first and with cloud bases down to around 500m. A small chance of a shower this morning too. Cloud lifting this afternoon to allow some sunny intervals to develop later this afternoon, followed by clear spells after sunset.

Chance of cloud-free hill tops above 800m: 20% or less at first, rising to around 50% by mid to late morning, then rising above 70% for this afternoon and evening.

Low Cloud and visibility: Poor or very poor at first in mist and fog patches, but improving to become good this afternoon with distant hills visible.

Meteorologist's View

Temperatures will remain on the chilly side near to the summits, so some warm clothing is advised.

Forecast for Sunday 11 Sep 2022

Weather: Dry during the day with patchy cloud and any early mist lifting to allow some sunny spells to develop. Feeling warm. Cloud then thickening from the west during the evening with some outbreaks of rain arriving, and turning misty again near the summits as the cloud base starts to lower.

Maximum wind: East or southeast 10 to 15mph, with gusts 20mph, turning southerly for the afternoon and evening and increasing 15 to 20mph, with gusts 25, occasionally perhaps 30mph.

Chance of cloud-free hill tops above 800m: Around 50% at first, increasing to 80% or more during the morning, then lowering to 30% or less through the evening.

Low Cloud and visibility: Moderate in early mist patches, then becoming good or very good, before dropping to moderate near the summits during the evening.

Temperature: **Valleys:** Plus 12 Celsius, rising to Plus 21 Celsius.
At 800m: Plus 8 Celsius, rising to Plus 15 Celsius.
Freezing level: Above the summits throughout.
